

## ANCILLARY KITS

For all the vaccines, except for the Pfizer vaccine, the ancillary kits will be built to support 100 doses. The Centers for Diseases Control and Prevention (CDC) refers to these as the standard kits.

The composition of a standard kit, designed for use in adults, is as follows:

*Note - CDC has included a 5% safety level of needles, syringes & alcohol prep pads.*

<i>Kit Description, Dimensions, and Weight</i>	<b>Product</b>	<b>Product Description</b>	<b>QTY/EA</b>
<b>Ancillary Adult</b>  <i>14 in x 13 in x 9 in 3.5lbs</i>	Needles	22-25G /1"	85
	Needles	22-25G /1.5"	20
	Syringes	1ml or 3 ml	105
	Alcohol Pads	Sterile, Individual	210
	Vaccination Card		100
	Needle Card		1
	Face Shield		2
	Face Mask		4

The Pfizer ancillary kit will support administration of 975 doses, the minimum direct shipping size for the Pfizer vaccine, and includes an overage of needles, syringes, and alcohol prep pads. The composition of a Pfizer kit, designed for use in adults, is as follows:

<i>Kit Description, Dimensions, and Weight</i>	<b>Product</b>	<b>Product Description</b>	<b>QTY/EA</b>
<b>Pfizer Ancillary Adult</b>  <i>24 in x 20 in x 24 in 40 lbs</i>	Needles	22-25G /1"	829
	Needles	22-25G /1.5"	200
	Syringes	1ml	1,024
	Needles, Mixing	21-25G x 1.5"	205
	Syringes, Mixing	3ml or 5ml	205
	Alcohol Pads	Sterile, Individual	2,458
	Vaccination Card		1000
	Needle Card		10
	Face Shield		20
	Face Mask		40
	Diluent		200

For North Dakota healthcare providers receiving less than the minimum doses required for direct shipping (i.e., Pfizer= 975 doses, Moderna = 100 doses), the NDDoH warehouse will breakdown the vaccine and ancillary supplies into smaller quantities.
